

READYBRIGHT®

Power Outage Lighting System

Instant Light the Moment You Lose Power

Key Features

- **Power Outage Activated:** When the MB220 is plugged into any outlet, all ReadyBright Power Outage Lights will instantly activate when you lose power.
- **Wireless/Remote Control Activated:** Simply pull the MB220 out of your outlet to activate any ReadyBright lights within 70 feet or use the remote control button to manually turn all lights on.
- **Installs in Minutes:** Have automatic safety lighting in an instant. Simply insert batteries and install in a central location of the home so you are prepared for your next power outage.
- **Auto Shut Off:** All ReadyBright lights will automatically turn off after 30 minutes to conserve battery life when you are not home. Simply pull unit out of wall or press the remote button to keep lights on continuously through a power outage.
- **Energy Efficient:** Our high quality LEDs provide over 40 hours of light on one set of batteries! Perfect for prolonged power outages.
